Exemplified products include skin lotions, hand creams, sunscreens, gels, cooling body splashes and make-up.</p> <p>ADVANTAGE A stable, non-discoloring product is provided.</p> <p>EXAMPLE An O/W emulsion useful as a skin lotion comprised by wt. ascorbic acid (0.2%), Retinol 15D (RTM) (0.2%) and tocopherol (0.1%), together with cetareth-6 and stearyl alcohol (2.5%), cetareth- 25 (2.5%), hydrogenated cocoglyceride (1.5%), PEG-40 dodecylglycol copolymer (3%), dimethicone (2%), phenethyl dimethicone (2%), cyclomethicone (1%), cetaryl octanoate 5%, avocado oil (1%), almond oil (2%), wheat germ oil (0.8%), USP panthenol (1%), phytantriol (0.2%), vitamin E acetate (0.3%), propyleneglycol (5%) and perfume/preservative/water (balance).</p>	<p>DE 10233740-A+</p>

TECHNOLOGY FOCUS

Organic Chemistry - Preferred Materials The retinoid is all-trans-retinol; (A) is L-ascorbic acid or salt; and (B) is α -tocopherol. Preferred Composition: The preparation contains (per wt. part retinoid) antioxidant (A) at 2-3 wt. parts and antioxidant (B) at 8-10 wt. parts, with the retinol being all-trans-retinol at 0.005-0.5 wt.%. The preparation is packaged in an oxygen-impermeable container without addition of a protective gas, the container especially being an aluminum tube internally provided with a protective lacquer.
